SUMMARY

I am a passionate person about the IT world, with experience as a Junior Front-End Developer skilled in React.js. I excel at turning designs into functional web applications and resolving technical challenges. Familiar in Web Development and actively improving my skills through projects and continuous learning.

EXPERIENCE

Junior Front-end Developer

04/2023 - 10/2023

Akram Afifi Holdings Sdn Bhd ↗

- Built a login system for the company website using React.js and Chakra UI based on Figma designs.
- Collaborated with senior developer and used GitLab for version control and code commits.
- Designed and implemented a user interface for the company dashboard following Figma specifications.
- Resolved merge conflicts independently during GitLab project integration.
- Developed a quiz functionality for the website by learning new technologies and techniques through self-study and online resources.
- Utilized HTML, CSS, JavaScript, React.js, and Chakra UI to create dynamic and responsive web pages.
- Managed the database of students and teachers, including handling prospective student inquiries and scheduling timetables.
- Acted as a customer service representative, addressing and resolving student and teacher issues through chat support.
- Demonstrated strong problem-solving skills by independently resolving technical issues.
- Continuously expanded technical knowledge by learning new languages and libraries required for various tasks.
